AVENTURA TO SHOWCASE PHYSICAL SECURITY INFORMATION MANAGEMENT PLATFORM AT ASIS ORLANDO

Hauppauge, New York, September 19, 2011—Aventura Technologies, Inc., the industry leader in advanced digital video recording technology will showcase the latest enhancements to Vantage™ a comprehensive security information management platform. Aventura's introduction of Vantage™ PSIM features a powerful intuitive centralized security solution on an open source platform.

Vantage™ offers a federation-class managed and cloud-based solution which can manage and correlate data from disparate communication and security devices. Total situational awareness is the key to Vantage™ in all aspects of a security initiative. While many PSIM/COP platforms address the physical and visual aspects of security Vantage™ takes it to the next level with communications management. Vantage™ is built on Aventura's enterprise architecture which provides for 100% fault tolerance and redundancy across the network.

Frances Cabasso, Aventura CEO said, "Vantage™ PSIM functionality expands on Aventura's industry leading platform of next-generation surveillance solutions, which have been highly regarded by both government and civilian clients worldwide."

Ms. Cabasso added, "The complexities of today's security environment call for more sophisticated management systems from an operational perspective. Critical though are understanding the balance between functional and information overload. Our key to success continues to be offering solutions that are intuitive and easy-to-use while providing the maximum persistent surveillance architecture."

Frances concluded, "Just as important in these economic trying times is the ability to leverage legacy investments and infrastructure of clients, which minimize obsolescence and maximize future potential. In support of that philosophy Aventura customizes solutions to customer requirements instead of trying to put the proverbial round pegs in square holes."

About Aventura Technologies, Inc.

Organized more than a decade ago and headquartered in New York, with satellite offices around the globe, Aventura is an industry leading designer, developer and manufacturer of "off-the-shelf" and custom-designed enterprise-level video hardware and software solutions for civilian and government.
